

Aukua Systems Adds GCH Services as UK Sales Partner

Aukua Systems Inc., a leading provider of precision Ethernet & IP Test and Monitoring solutions announced today the addition of UK partner GCH Test & Computer Services Ltd; experts in network security, storage and cloud solutions.

AUSTIN, Texas (PRWEB) August 02, 2021 -- Aukua Systems Inc., a leading provider of precision Ethernet and IP Test and Monitoring solutions announced today the addition of UK partner GCH Services; experts in network security, storage and cloud solutions. The addition of GCH Test & Computer Services Ltd sees Aukua's award winning solutions made available to the UK market providing local sales and support for their range of test and monitoring products.

Aukua has most recently released the ground breaking XGA4250 High Speed 3-in-1 Ethernet & IP Test Platform complementing the prolific MGA2510 by extending its unique 3-in-1 testing solution to support higher speeds of 25G and beyond.

GCH brings considerable value to the Aukua ecosystem providing sales and support to customers nationwide. "Our team is focused on best-of-breed solutions and we are delighted to offer Aukua's test and monitoring tools to our existing and future customer base. We evaluated a number of solutions in the network and testing space and Aukua's product suite delivered the best value and feature-set available today." Said GCH's Sales & Marketing Director, Laky Hothi.

GCH's team are immediately able to sell and support the Aukua suite of products having undergone test and training over recent weeks. As part of Aukua's robust partner program they will be able to provide evaluation programs as well as customer support to UK-based clients.

ABOUT AUKUA SYSTEMS

Aukua Systems Inc. is a leading provider of Ethernet testing and visibility solutions. Whether developing, validating, deploying, supporting or managing applications or networks, our solutions help improve performance and make networks more secure. The Aukua product line includes packet capture tools, analysers, traffic generators, and network impairment emulators. Since 2015, equipment manufacturers, semiconductor companies, automotive OEMs and Tier1's, large enterprises, service providers, and government agencies worldwide have depended on Aukua to build stronger and more secure applications and networks. Aukua Systems is based in Austin TX USA.
